

## Dr. Kevin Sullivan

Dr Sullivan received his Doctor of Naturopathy degree from the Clayton School of Natural Healing in Birmingham, Alabama, in 1992.

In his practice, he has developed his own line of herbal and homeopathic remedies, which are used by doctors and health practioners across the country.

He has a passion for treating the root causes of illnesses, not just the symptoms.

Seeking a cure for his own chronic asthma, he left his profession as a mechanical engineer to pursue a new career in holistic medicine. By working with the EAV testing and homeopathy, he found the cure not only for his asthma,, but for his chronic pain as well.

He is the author of the book, ***herbolution*** that describes in depth about this type of testing, and discusses the many parasites, fungus, virus, bacterias, and man made medicines that are wrecking havoc on our health.

# What is keeping me from wellness? Discover how to 'reboot' your system

## What is Computerized Wellness Screening?

An EAV Assessment, a computerized screening system, is an innovative testing method that has been widely used for over 60 years. It is used extensively throughout Europe by over 25,000 medical practitioners, and is gaining acceptance in the United States.

EAV utilizes the body's acupuncture meridians or the "energetic system" as a means of communicating with the body.

This energetic system is a network of communication pathways in touch with even the smallest corner of your body.

By indirectly measuring this energetic system, EAV can evaluate the functional condition and general health of the entire body, including determining the presence or absence of parasites, bacteria, fungi, viruses, and toxins, and man made chemicals and heavy metals.

It only requires a small blood sample, that is mailed to Dr. Sullivan and the results sent back to the health advisor the patient is working with.

The results show what is present that should not be in the body, and also reveals which organs are being the most affected.

## What Does this Testing look for?

This mode of specialized testing scans several drops of your blood and screens it to detect imbalances and toxins in the body.

The screening can check for over 14,000 different elements, such as **metals, chemicals, radiation, and residue from medications and more.**

Discover the presence of harmful **bacteria, viruses, fungus, parasites, and venom.**

This test identifies your **blood PH, deficiencies in vitamins, minerals, healthy bacteria, and missing digestive enzymes, stomach acid levels, and more.**

It also identifies any **neurotransmitter deficiencies in the brain.**

*Testing kits are available by mail or in person from a local provider.*

*To receive a testing kit or consultation contact:*

## Why get tested?

This testing can **eliminate much of the guess work** of what the body needs for supplementation, since the specific needed items will be revealed.

There is so much data that can be gathered on our systems, and different doctors specialize in certain areas for that reason, so they can treat what they have focused on.

The human body is so complex it is beyond the scope of any one doctor, or any one test. This test is another aspect of how to assess overall health at the baseline level.

Once the system is free from harmful elements, and starts being replenished with needed items, the immune system can 'reboot' itself and heal.

This test works just as well on animals as it does humans. It can be easier to ask for a small blood sample from your veterinarian than to do this part yourself. Animals respond very well to herbal and homeopathic remedies.

**All needed remedies are formulated by Dr. Sullivan, and available for purchase through your consultant.**

**Contact Vital Infusion with any questions or to get a test kit mailed to you, unless you are local.**

**Appointments will be set for those in the local area.**
